

AI Prompting Academy

Workplace AI learning for prompt craft

Rawle Arneaud · @Studmuffino1 · Hult Cohort Program

<https://prompt-like-a-pro-red.vercel.app>

Problem

Professionals have Copilot. Prompts still fail.

- Vague asks → mushy drafts
- Invented certainty → not safe to send upstairs
- Rewrites erase the time AI was supposed to save

Insight

The skill gap is **method**, not model access.

Teams don't need another chatbot. They need a short, repeatable way to ask.

Solution

AI Prompting Academy — MVP workplace AI LMS.

First course: **SCORE** (*Prompt Like a Pro*) for Copilot and other assistants.

Product

- ~60 minute SCORE curriculum
- Modules, quizzes, baseline → retest
- Progress tracking
- Individual + team access at [/pricing](#)

Demo

Live app:

<https://prompt-like-a-pro-red.vercel.app>

Open the course → apply SCORE to a real email or status update.

Market

Layer	Focus
TAM	Global corporate AI / digital-skills training
SAM	Workplace Copilot / gen-AI upskilling (EN knowledge workers)
SOM	Prompt-craft LMS seats winnable in 24 months

Sources detailed in market-research.md

Competition

Alternative	Gap vs Academy
MOOCs	Long, generic
Copilot Learn / docs	Reference, not practice LMS
Internal L&D decks	Not productized
Prompt tip threads	No curriculum or accountability

Business model

Plan	Pilot price (hypothesis)
Individual	\$29 one-time / \$9 mo
Team	\$199 / 10 seats
Enterprise	Custom (roadmap)

Go-to-market

- Founder-led outreach to people who live the Copilot pain
- Sell a dated paid session, then productize
- Convert early users into interviews and design partners

Customer discovery

- **35** survey responses (13–15 Aug 2026)
- Pain: generic output, rewriting, low trust, weak prompts
- WTP: mostly free / under TT\$150; minority TT\$150–300
- **11** asked to be contacted (pilot leads)

Insight: the gap is prompt effectiveness — not AI access.

Traction

- Production app live
- **10** qualified external product users (20 Aug 2026 snapshot)
- 35 survey / 11 pilot leads — survey ≠ product users

The ask

20 minutes for deck/pricing feedback, or an intro to an L&D / workplace-AI buyer.

Signal and intros first — not a term sheet in this meeting.

Team

Rawle Arneaud (@Studmuffin01)

Shipped the SCORE learning app in the Hult Cohort; packaging it as AI Prompting Academy with pricing, investor materials, and external traction.

Close

Prompt craft for Copilot that managers can forward.
