

AI Prompting Academy

Venture Overview

Founder: Rawle Arneaud

Website: <https://prompt-like-a-pro-red.vercel.app>

Opportunity

Artificial intelligence tools such as Microsoft Copilot, ChatGPT, Gemini, Claude, and Perplexity are rapidly becoming part of everyday work. However, many professionals struggle to achieve consistent, high-quality results because they lack practical training in how to communicate effectively with AI.

Common challenges include:

- Receiving responses that are too generic or incomplete
- Spending excessive time revising AI-generated outputs
- Uncertainty about how to structure prompts effectively
- Difficulty integrating AI tools into daily workflows

As AI adoption accelerates across industries, there is growing demand for accessible, practical learning solutions that help individuals and organizations maximize productivity and value from these tools.

Solution

AI Prompting Academy is a workplace learning platform that helps professionals develop practical AI prompting skills through structured frameworks, guided lessons, and real-world exercises.

The Academy launched with its first course, **Prompt Like a Pro: The SCORE Method for Copilot**, a framework-based learning experience that teaches users how to generate more effective responses from Microsoft Copilot by:

- Defining context clearly
- Specifying objectives effectively
- Establishing constraints and expectations
- Improving response relevance and quality
- Reducing time spent revising outputs

The long-term vision is to expand the Academy with additional frameworks and learning pathways tailored to leading AI platforms and workplace use cases.

Target Market

AI Prompting Academy is initially focused on:

- Business professionals
- Managers and supervisors
- Administrative and support staff
- Educators and trainers
- Small and medium-sized businesses adopting AI tools

Future expansion opportunities include corporate training programs, enterprise licensing, professional certification pathways, and industry-specific AI productivity training.

Traction and Validation

- Customer discovery survey: **35** respondents (13–15 Aug 2026); **11** asked to be contacted about a pilot.
 - Live MVP launched and publicly accessible at: <https://prompt-like-a-pro-red.vercel.app>
 - Product users: **10** qualified external users (metrics snapshot 20 Aug 2026 via Ludwitt reference API); actively recruiting toward broader adoption.
 - Survey respondents are validation signal only — not counted as product users.
-

Business Model

Revenue streams include:

- Individual learner subscriptions
- Premium learning modules
- Corporate training packages
- Enterprise licensing
- AI productivity workshops and consulting services

Pilot pricing (hypothesis): Individual **\$29** one-time / **\$9** mo; Team **\$199** / 10 seats.

The Academy is designed as a scalable learning platform serving both individual professionals and organizational training initiatives.

Growth Roadmap

The current MVP validates the Academy's first learning framework, the SCORE Method for Microsoft Copilot.

Future platform expansion may include:

- Prompt Like a Pro for ChatGPT
- Prompt Like a Pro for Gemini
- Prompt Like a Pro for Claude
- Prompt Like a Pro for Perplexity
- Prompt Like a Pro for Notion AI
- Industry-specific prompting frameworks
- Certification and professional development pathways

The goal is to create a comprehensive learning ecosystem that helps professionals build AI fluency across multiple AI assistants and workplace scenarios.

Vision

Our vision is to become a trusted destination for AI productivity learning by helping professionals develop practical skills that improve the quality, efficiency, and impact of AI-assisted work.

We believe effective prompting will become a foundational workplace competency, and AI Prompting Academy aims to provide the structured learning pathways needed to develop that capability at scale.

Current Focus

We are seeking conversations with advisors, operators, potential pilot customers, strategic partners, and early-stage investors interested in:

- Workplace AI adoption
- Professional learning technologies
- AI productivity and workforce enablement

We welcome feedback, partnership discussions, pilot opportunities, and introductions that can help accelerate product validation and growth.
